

**MAKE
YOUR
FOOD
DELIVERY
FLY**

Start earning money through food delivery

Food delivery is a growing business, and therefore an opportunity that can be added to the traditional restaurant business.

LinearBi technologies allow you to manage your relationship with the customer, with complete autonomy, and allowing you to deliver dishes with the same quality as served at the table. From the point of order to delivery, the quality is finally in your hands.

DeliveryBox

Patented containers for the transport of cold, hot and fried foods at a controlled temperature.

BiComm

The platform allows you to publish menus and receive orders.

BiRoute

The App optimizes the delivery rounds of your drivers and allows you to monitor them remotely.

DeliveryBox

The revolutionary patented containers for the transport of food at controlled temperatures

The DeliveryBox that's right for you

M Box

Hot and fried dishes or cold dishes.

6 fried dishes

6 hot dishes

4 hot dishes + 2 fried dishes

8 cold dishes

L Box

Pizzas, hot and fried dishes or cold dishes.

13 pizzas

12 dishes + 6 pizzas

12 dishes + 4 fried dishes + 3 pizzas

20 dishes

XL Box

Containers for buffets, hot, fried or cold dishes.

2 large trays + 4 small trays

2 medium trays + 8 small trays

DryKeeper. Finally, fried and crispy pizzas

The **DeliveryBox** with **DryKeeper** is the solution you have been waiting for! It transports fried food and pizzas while maintaining the ideal taste. The patented **DryKeeper** technology generates heat inside the box, while a gentle flow of air expels the humidity to keep dishes crunchy for a long time.

The **DryKeeper** maintains the heat for over 60 minutes at a temperature of 65°C, in compliance with the CE852/2004 standard. Even on winter days the dishes are kept warm.

Generic container

L-Box DryKeeper

Hot dish

	Time	Temp (°C)	Humidity (%)	Legend	Temp (°C)	Humidity (%)	Legend

● Hot fried and crispy.
HACCP compliance.

○ Fried lukewarm and moist.
Non-compliance with HACCP.

Hot or colds dishes. Configure your DeliveryBox

LinearBi boxes offer you ample flexibility for the delivery of hot and cold dishes. You can configure each **DeliveryBox** by creating the most suitable microclimate for the type of order. Even with long distances, the high insulating power keeps the food at a temperature above 65°C or below 10°C, depending upon your requirements. The safety and quality of preservation allows drivers to serve multiple customers on a single journey, optimizing costs and delivery times.

Patented technology

1.

Ergonomic handles

Lateral grip is ensured by sturdy ergonomic handles

2.

Quick release hinges

They allow for easy disassembly of the door so that the box can be washed

3.

Front opening

Front opening with drop down door and quick closing system

4.

Stackable boxes

Stackable boxes with non-slip matrix

5.

Solidity and lightness

Boxes made of lightweight, durable 100% recyclable material

6.

Well-organized compartment

Internal horizontal and vertical dividers allow you to organize spaces

7.

Identification label

Each box is designed so that order can be quickly identified during delivery

8.

Thickness ensures a high degree of insulation

High insulation thickness of closed cell polypropylene foam

9.

Cold compartment

Low temperatures are maintained by special eutectic plates inserted in the dedicated compartment. (Optional)

10.

Rechargeable battery

DryKeeper indicates the battery charge level. Recharging and replacement are very quick

11.

Bevelled edges

All corners are rounded for comfort, and for maximising hygiene and cleanliness

12.

Vent

Excess humidity is expelled from the special vent, ensuring a dry and warm microclimate

Bespoke packaging for five star delivery

LinearBi offers a complete range of modular containers for transporting your prepared dishes. LinearBi packaging is eco-friendly and compostable.

The solution for crispy fried food

The micro-perforated packaging for fried foods allows the moisture to evaporate and maintains its temperature, so that the food will arrive on your customers' table with the crunchiness they expect.

Plug&play trays

The trays are comfortable, elegant and ready to serve. The die-cut interior keeps preparations safe during transport, and at buffets and events, small glasses, finger foods and small desserts can be served by simply removing the lid.

Space-saving shopper

Shoppers are designed to be compatible with the most popular dishes and containers used in food delivery.

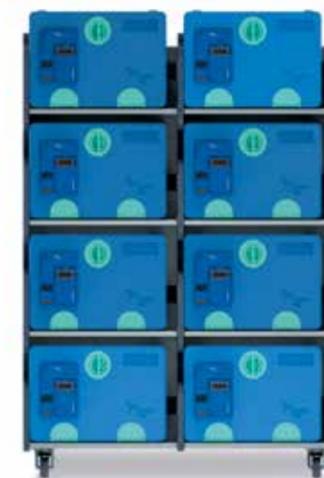

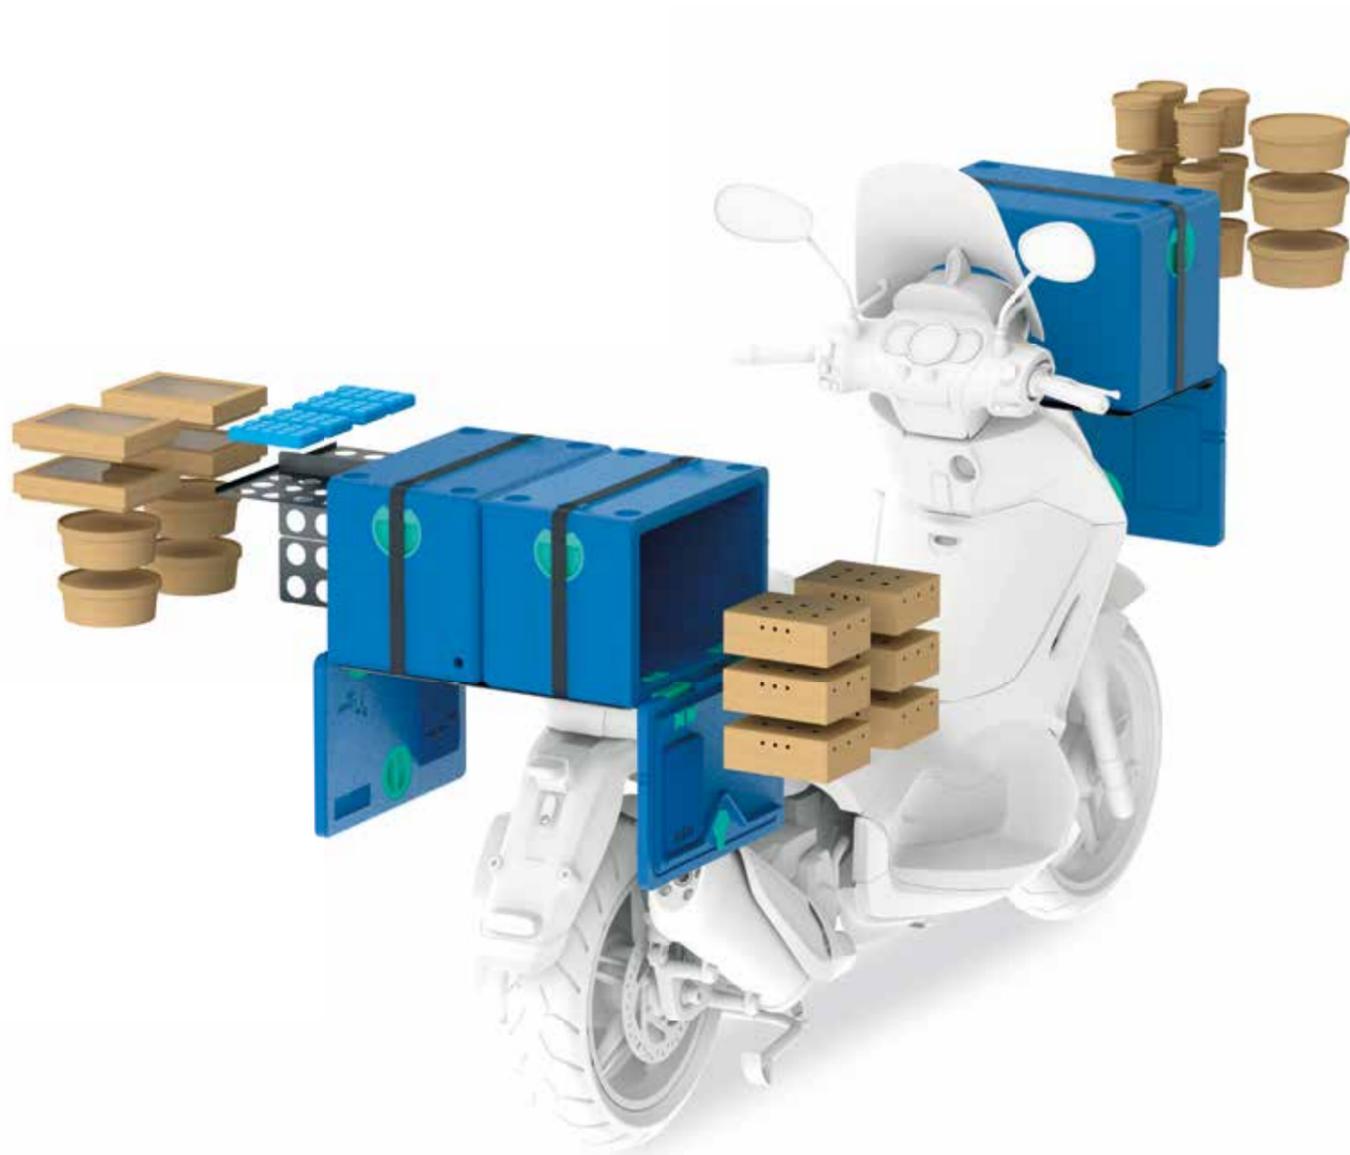

MoveBox

DeliveryBox handling
and transport systems

Scooter

The dedicated supports allow the configurable use of all **LinearBi** boxes, offering ample flexibility for deliveries. Choose between **L-Boxes**, **XL-Box** or create different compartments dedicated to hot, cold and fried dishes using up to **3 M-Boxes**.

3 M-Boxes

1 XL-Box

1 L-Box + 1 M-Box

1 L-Box

L-Box backpack

With bikes, e-bikes and scooters your riders move with extreme freedom in the city centers and restricted traffic areas. The **L-Box Backpack** allows you to carry up to 13 pizzas or up to 24 dishes. The padded shoulder straps and backrest ensure that it is comfortable to use, while the adjustable front straps offer a high level of stability.

Mini-van and TrolleyBox

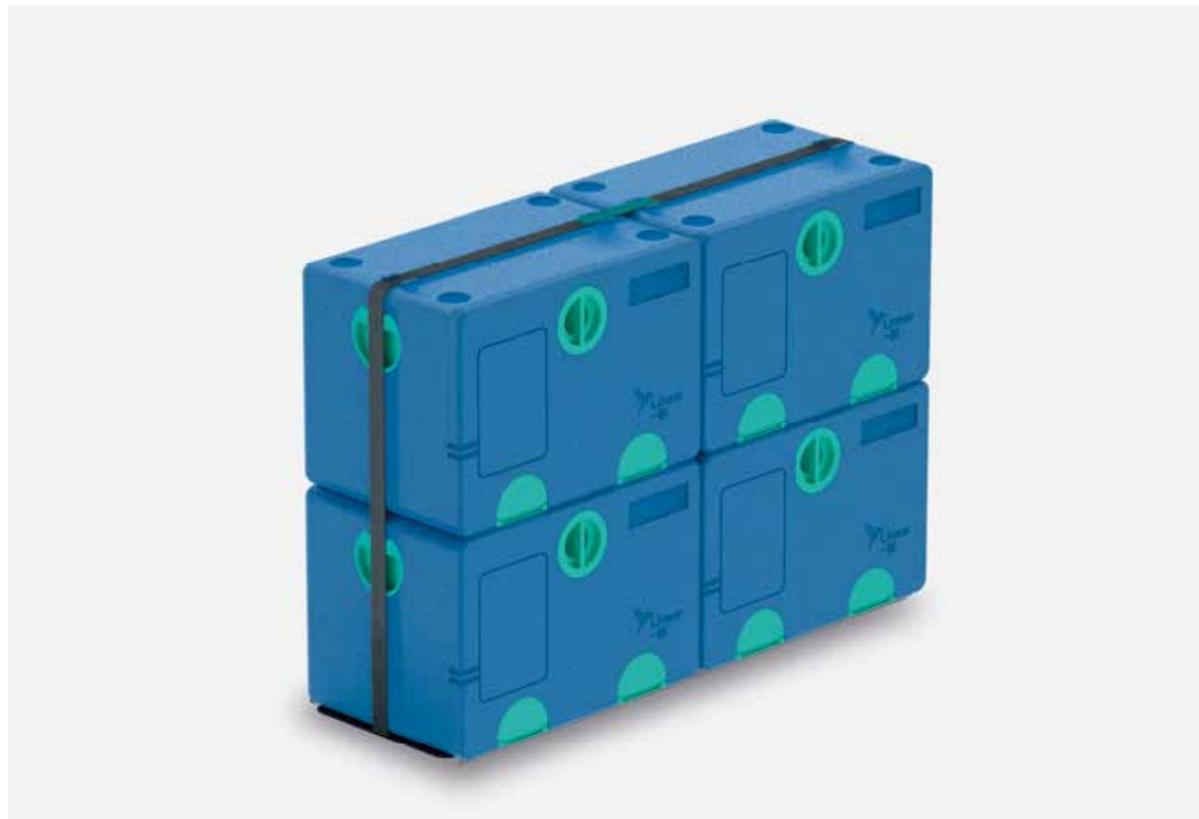

For deliveries to big companies or events with numerous participants, the simultaneous transport of the entire order proves to be a winning solution. The special **extractable support** allows the transport of **multiple overlapping**, organised **DeliveryBoxes**. Thanks to the LinearBi connections it is possible to transfer the entire box matrix from the **TrolleyBox** to the van, and vice versa, with the minimum of effort.

The **TrolleyBox** has a solid steel structure that guarantees stability and high capacity, while the foldable frame minimizes the overall dimensions.

HolderBox

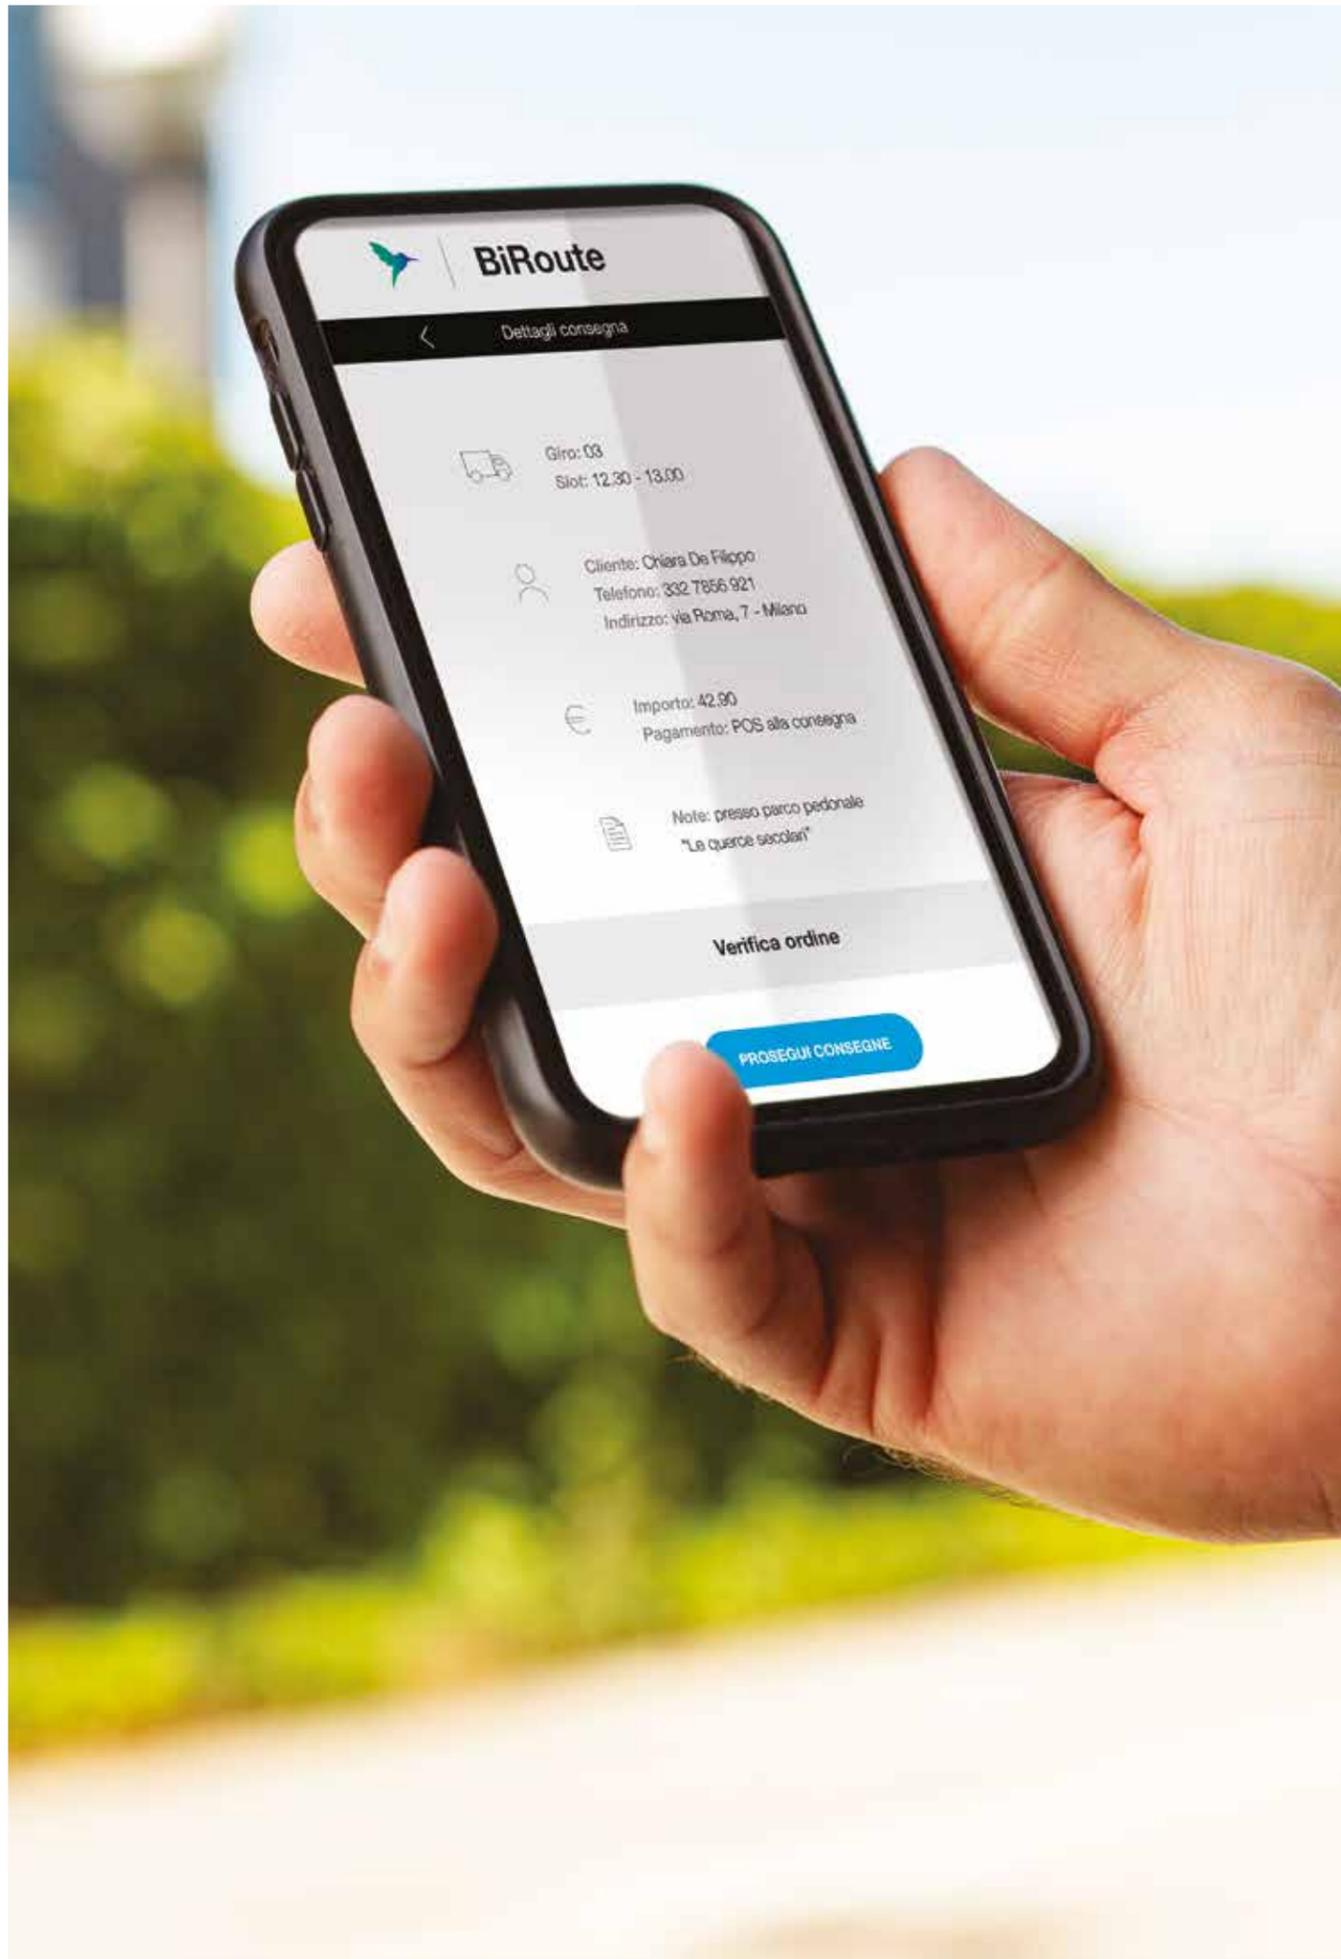

Deliveries to companies, large buildings and exhibition areas are facilitated by the use of **HolderBox**. The practical support allows the safe transport of **4 M-Boxes** from your vehicle to the customer avoiding spillage from the dishes. **HolderBox** is light and foldable and can be conveniently loaded into a van or a car.

Charge Station

The **Charge Station** keeps dishes warm and dry, even in the phases preceding the driver's departure. The advantages multiply: the batteries do not consume energy, but actually recharge! At the end of the service, place your **DryKeeper DeliveryBoxes** in the **Charge Station** and you can be sure that they will always be ready for use.

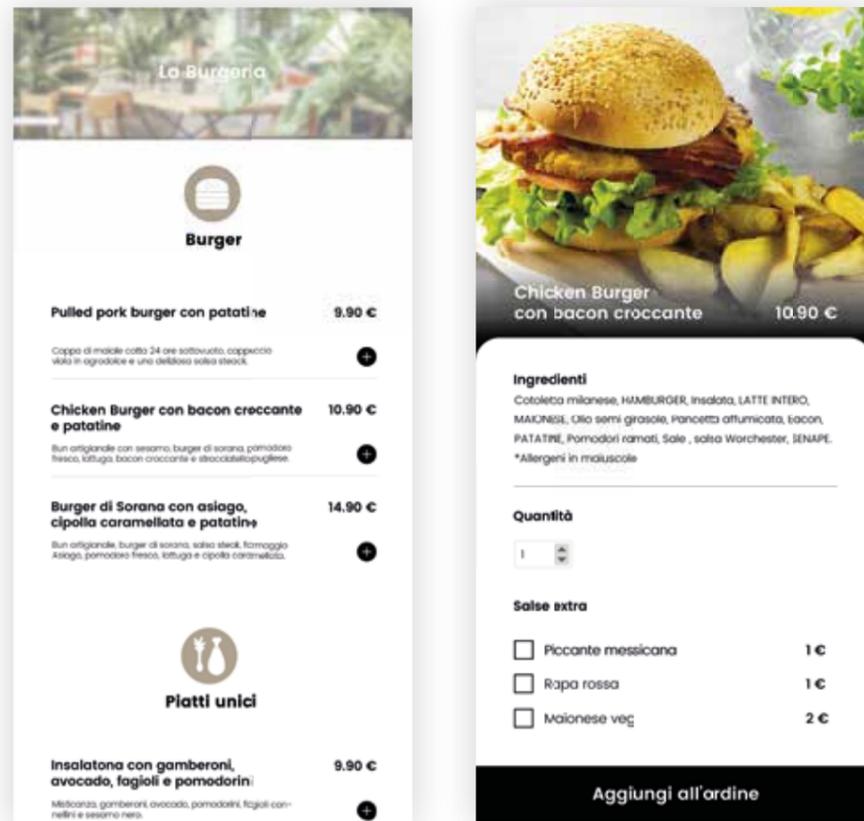

BiComm and BiRoute

Customized independent solutions
for receiving and managing orders
and deliveries without intermediaries

BiComm. Your e-commerce

BiComm is a personalized e-commerce where you can publish your menu and receive orders. Easy to configure, it can be linked to your local website or used as a new portal.

Your unique e-commerce

Publish your menu with price, description, ingredients and images. Make changes whenever you want.

Personalized dishes

Satisfy even the most demanding customers. Ingredients can be added or excluded, and sauces can be chosen to complete the dishes.

Track sales

The sales results are available on a dedicated panel where you can view the relevant data necessary to guide your business.

Captivating photos

Publish captivating photos of your dishes to increase sales. Don't have the photos? We can help you make them happen!

Delivery areas

Draw one or more delivery zones on the map. You can then define different transport costs for each area.

Promote delivery

The contact details of your customers represent value. BiComm creates a database which allows to promote your business.

Delivery slots

Choose the length and the maximum number of orders for each delivery slot. Automatic blocking avoids the risk of overbooking.

Secure payment

Payments are total secure. Money generated on BiComm is regularly credited to your checking account.

Order alert

You will receive an alert each time you receive an order indicating the customer's data, the dishes chosen and the time of delivery.

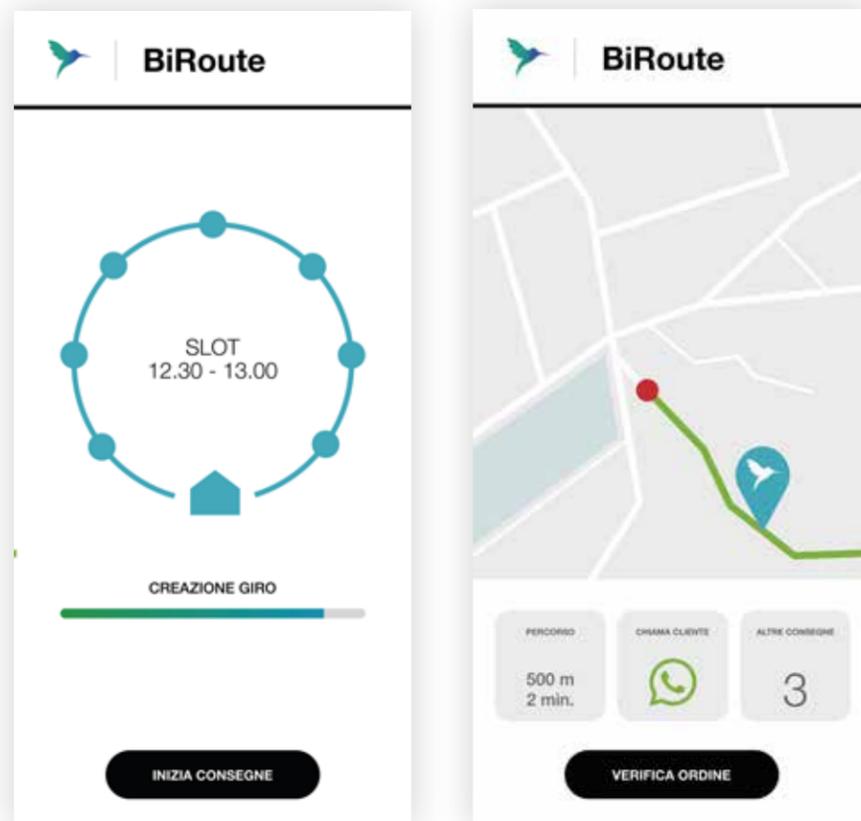

Close to you

LinearBi staff is always available to help you configure BiComm. It sends detailed and transparent sales reports.

BiRoute manages orders and deliveries

BiRoute is the intelligent App that communicates with **BiComm** and organizes the delivery round by optimizing times and routes. **BiRoute** automatically defines which dishes to insert in each box, taking into account the number of vehicles in your fleet.

Labels creation

Each dish is provided with an appropriate recognition label generated by the software. It facilitates delivery by eliminating errors.

Dish - box link

BiRoute automatically defines the Box in which into dish should be inserted, taking into account the service temperature, driver and delivery address.

Priority management

Each order is scheduled according to the requests already received, the delivery slot and the preparation times.

Automatic delivery schedule

BiRoute automatically creates a schedule to optimize and reduce driver movements.

Optimize loads

BiRoute maximizes the load of each available vehicle while avoiding unnecessary trips allowing you to save money.

Customer information

BiRoute will provide the driver with the delivery information so as to ensure punctuality and safety: customer contact details, order details, position of dishes and boxes.

Super Admin

Create new profiles for each of your collaborators, which will enable them to view only the necessary data.

Location of the driver

Knowing the location of the drivers allows you to respond accurately to customers and improve work schedules.

10 reasons for choosing LinearBi

1.

Greater earning power

Working without intermediaries saves on commission costs.

3.

Free advice

LinearBi offers you free advice on the selection and management of drivers, so you can create the best delivery schedule.

5.

A Delivery service from A to Z

We provide you with a system to manage your food delivery service from A to Z. Box, BiComm and BiRoute software are designed and built by LinearBi.

7.

Selected packaging

The containers for your prepared dishes are tested for their ability to preserve quality, and the size is selected to make the most of each DeliveryBox.

9.

Flexibility in the choice of the vehicle

DeliveryBoxes are transportable by any means, we have created a wide range of solutions that allow you to change the layout of your vehicles with ease.

2.

Quality delivery

You have control over the entire process from order to delivery, which allows you to control the quality the customer receives.

4.

Speed and precision

You can change menus, descriptions and prices on BiComm at any time.

6.

Patented DeliveryBox

Cold, hot or fried dishes can be transported in total safety. We have patented solutions to preserve the quality of your cooking.

8.

Order online

All consumables can be purchased directly from our linearbi.com e-shop. It takes just a couple of minutes to place your order.

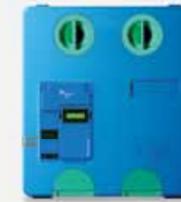

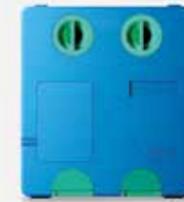

10.

We have the experience

We use our technologies every day to deliver dishes and buffets to hundreds of customers.
